

A1
1. (Amended) A structured composition comprising:

(a) at least one dyestuff; and

(b) at least one continuous liquid fatty phase comprising:

(i) at least one structuring polymer which has a weight-average molecular mass ranging from 1000 to 30,000 and comprises:

a) a polymeric skeleton comprising repeating units comprising at least one non-pendant hetero atom; and

b) at least one fatty chain, optionally functionalized, comprising from 12 to 120 carbon atoms, chosen from pendant fatty chains and terminal fatty chains which are bonded to said polymeric skeleton;

wherein said at least one fatty chain is present in a quantity ranging from 40% to 98% of the total number of all said repeating units comprising at least one non-pendant hetero atom and all said at least one fatty chains;

wherein said structured composition is in the form of a wax-free solid;

wherein said at least one dyestuff is chosen from pigments and nacs; and

wherein said at least one dyestuff, said at least one continuous liquid fatty phase

and said at least one structuring polymer form a physiologically acceptable medium.

A2
15. (Amended) A composition according to Claim 1, wherein said repeating units comprising at least one non-pendant hetero atom are chosen from repeating units comprising hydrocarbon-based repeating units and silicone units which form a polyorganosiloxane-type skeleton, repeating units comprising amide units which form a polyamide-type skeleton, repeating units comprising units which comprise

isocyanate groups which form a skeleton chosen from polyurethane-type skeletons, polyurea-type skeletons and polyurea-urethane-type skeletons, repeating units comprising carbamate which form a skeleton chosen from polyurethane-type skeletons, polyurea-type skeletons and polyurea-urethane-type skeletons, and repeating units comprising urea which form a skeleton chosen from polyurethane-type skeletons, polyurea-type skeletons and polyurea-urethane-type skeletons.

A3

29. (Amended) A composition according to Claim 28, wherein said at least one alcohol is chosen from monoalcohols comprising from 10 to 36 carbon atoms.

A4

32. (Amended) A composition according to Claim 1, wherein said at least one structuring polymer is chosen from polymers of formula (I) below and mixtures thereof:

in which:

- n is an integer which represents the number of amide units such that the number of ester groups present in said at least one structuring polymer ranges from 10% to 50% of the total number of all said ester groups and all said amide groups comprised in said at least one structuring polymer;

- R¹, which are identical or different, are each chosen from alkyl groups comprising at least 4 carbon atoms and alkenyl groups comprising at least 4 carbon atoms;

- R^2 , which are identical or different, are each chosen from C_4 to C_{42}

hydrocarbon-based groups with the proviso that at least 50% of R^2 are chosen from C_{30} to C_{42} hydrocarbon-based groups;

- R^3 , which are identical or different, are each chosen from organic groups comprising atoms chosen from carbon atoms, hydrogen atoms, oxygen atoms and nitrogen atoms with the proviso that R^3 comprises at least 2 carbon atoms; and

- R^4 , which are identical or different, are each chosen from hydrogen atoms, C_1 to C_{10} alkyl groups and a direct bond to group chosen from R^3 and another R^4 such that when said at least one group is chosen from another R^4 , the nitrogen atom to which both R^3 and R^4 are bonded forms part of a heterocyclic structure defined in part by R^4 -N- R^3 , with the proviso that at least 50% of all R^4 are chosen from hydrogen atoms.

50. (Amended) A composition according to Claim 46, wherein said at least one amphiphilic compound comprises at least one lipophilic part bonded to at least one polar part.

64. (Amended) A composition according to Claim 32, wherein said R^3 , which are identical or different, are each chosen from C_2 to C_{36} hydrocarbon-based groups and polyoxyalkylene groups.

65. (Amended) A composition according to Claim 32, wherein said R^3 , which are identical or different, are each chosen from C_2 to C_{12} hydrocarbon-based groups and polyoxyalkylene groups.

83. (Amended) A composition according to Claim 82, wherein said composition is chosen from mascaras, eyeliners, foundations, lip compositions, blushes, products for making up the body, eyeshadows, face powders, and concealer products.

A8
85. (Amended) A composition according to Claim 1, wherein said composition further comprises at least one additional dyestuff chosen from lipophilic dyes and hydrophilic dyes.

A9
94. (Amended) A composition according to Claim 90, wherein said composition is chosen from mascaras, eyeliners, foundations, lip compositions, blushes, deodorant products, make-up-removing products, products for making up the body, eyeshadows, face powders, and concealer products.

A10
100. (Amended) A composition according to Claim 95, wherein said composition is chosen from mascaras, eyeliners, foundations, lip compositions, blushes, products for making up the body, eyeshadows, face powders, and concealer products.

A11
109. (Amended) A composition according to Claim 101, wherein said composition is chosen from mascaras, eyeliners, foundations, lip compositions, blushes, products for making up the body, eyeshadows, face powders, and concealer products.

110. (Amended) A lip composition comprising:

- (a) at least one pigment in an amount sufficient to make up the lips; and
- (b) at least one continuous liquid fatty phase comprising:

- (i) at least one structuring polymer which has a weight-average molecular mass ranging from 1000 to 30,000 and comprises:

- a) a polymeric skeleton comprising repeating units comprising at least one non-pendant hetero atom; and

- b) at least one fatty chain, optionally functionalized, comprising from 12 to 120 carbon atoms, chosen from pendant fatty chains and terminal fatty chains which are bonded to said polymeric skeleton;

Please add new claims 162-166 as follows:

46
46 -- 162. (New) A structured composition comprising:

(a) at least one dyestuff;

(b) at least one continuous liquid fatty phase comprising:

(i) at least one structuring polymer which has a weight-average molecular mass ranging from 1000 to 30,000 and comprises:

a) a polymeric skeleton comprising repeating units comprising at least one non-pendant hetero atom; and

b) at least one fatty chain, optionally functionalized, comprising from 12 to 120 carbon atoms, chosen from pendant fatty chains and terminal fatty chains which are bonded to said polymeric skeleton;

(c) at least one amphiphilic compound chosen from amphiphilic compounds which are liquid at room temperature and have an HLB value of less than 12; and

wherein said at least one fatty chain is present in a quantity ranging from 40% to 98% of the total number of all said repeating units comprising at least one non-pendant hetero atom and all said at least one fatty chains;

wherein said structured composition is in the form of a wax-free solid; and

wherein said at least one dyestuff, said at least one continuous liquid fatty phase and said at least one structuring polymer form a physiologically acceptable medium.

163. (New) A structured composition comprising:

- (a) at least one dyestuff; and
- (b) at least one continuous liquid fatty phase comprising:
 - (i) at least one structuring polymer which has a weight-average

molecular mass ranging from 1000 to 30,000 and comprises:

- a) a polymeric skeleton comprising repeating units comprising at least one non-pendant hetero atom; and
- b) at least one fatty chain, optionally functionalized, comprising from 12 to 120 carbon atoms, chosen from pendant fatty chains and terminal fatty chains which are bonded to said polymeric skeleton;

wherein said at least one fatty chain is present in a quantity ranging from 40% to 98% of the total number of all said repeating units comprising at least one non-pendant hetero atom and all said at least one fatty chains;

wherein said at least one continuous liquid fatty phase comprises greater than 40% by weight of the total weight of said at least one continuous liquid fatty phase of at least one apolar liquid oil;

wherein said structured composition is in the form of a wax-free solid; and
